PROFESSIONAL SUMMARY

B.Tech Computer Science undergraduate (2027) with strong Java and Object-Oriented Programming skills. Hands-on experience in building full-stack web applications using Java, Spring Boot, and React.js. Proficient in OOP principles, Data Structures & Algorithms, Multithreading, and system design fundamentals. Solved 400+ problems on LeetCode and GeeksforGeeks. Quick learner with a strong problem-solving mindset.

TECHNICAL SKILLS

Languages	Java, JavaScript (ES6+), Python
OOP & Core Java	Object-Oriented Programming, Multithreading, Collections Framework, Exception Handling, Generics
Backend	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, REST API, Hibernate, JDBC, Servlets
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Axios, DOM Manipulation
Database	MySQL, SQLite, JPA / ORM, SQL Query Optimization
DevOps & Tools	Docker, Git, GitHub, GitHub Actions, Postman, IntelliJ IDEA, VS Code
Security	JWT Authentication, Spring Security, OWASP Top 10, RBAC, SQL Injection Prevention
AI & ML	OpenAI API, MediaPipe, OpenCV, Flask, WebSocket
CS Core	Data Structures & Algorithms, OOPs, DBMS, System Design Fundamentals

EDUCATION

B.Tech – Computer Science & Engineering | Panipat Institute of Engineering and Technology 2023 – 2027

Relevant Coursework: Data Structures & Algorithms, OOPs, DBMS, Multithreading, System Design

Problem Solving: 400+ problems — LeetCode, [GeeksforGeeks](#), CodeStudio & InterviewBit

PROJECTS

University Management System | Java · Spring Boot · React · MySQL · JWT · Multithreading · Git 2025

- Designed and built a full-stack application using Java and Spring Boot demonstrating strong OOP principles — Inheritance, Polymorphism, Encapsulation, and Abstraction across all service layers
- Developed 15+ RESTful APIs with Spring Data JPA and MySQL; implemented JWT-based authentication with Spring Security and Role-Based Access Control (RBAC) for students, faculty, and admin
- Applied Multithreading concepts for concurrent request handling; designed a normalized MySQL schema with JPA/Hibernate ORM ensuring data integrity and error-free transfer between layers
- Maintained Git-based version control as living documentation — full PR history, design change logs, and code reviews across all feature implementations

AI Smart TV & Laptop Control System | Java · Python · Flask · MediaPipe · OpenCV · WebSocket · Docker 2026

- Built a real-time touchless control system applying OOP design patterns — achieved 25–30 FPS with 10+ gesture types using MediaPipe and OpenCV with smart cooldown logic
- Integrated REST APIs from 4+ Smart TV brands (LG WebOS, Samsung SmartThings, Sony Bravia, LIRC) into a unified backend, demonstrating strong system design and API integration skills
- Deployed full system via Docker + Nginx with bilingual voice command support (Hindi + English), SQLite logging, and complete API documentation for knowledge transfer

ACHIEVEMENTS & PROBLEM SOLVING

- Solved 400+ DSA problems across LeetCode, GeeksforGeeks, CodeStudio, and InterviewBit — strong in Arrays, Strings, Trees, Graphs, and Dynamic Programming
- Strong grasp of Java Multithreading — thread lifecycle, synchronization, executor framework, and concurrent collections studied and applied in project development
- Applied OWASP Top 10 security practices — SQL Injection prevention, RBAC, and Secure API design across all production-grade projects
- Integrated AI-powered features using OpenAI API and MediaPipe in deployed, real-world applications
